Subject: TSAC and Lamorinda Weekly

Good Morning Jill,

If the article in the current issue of the Weekly is correct, the traffic concerns about the areas of CP, JM and Camino Woods, in my opinion, are related to the one remaining "hump" on Camino Pablo (which is NOT mentioned in the article). Drivers are avoiding the hump by using Tharp and Rimer.... and Larch. Before and after school one cannot drive fast because there is too much traffic. The speeding issue is during mid-day, weekends, summer, holidays, and at night. School traffic presents many concerns, but not traditional speeding

TSAC should be retained. Now there apparently are no "hot" issues. There have been some in the past and no doubt there will be some in the future. Community traffic concerns should be referred to TSAC rather than taking time of staff and Council. -- The need for volunteers should be further publicized. If needed, I would consider serving.
