# Ideas and Concepts

**Connect** Moraga Road from end to end and to and from Moraga's neighborhoods, schools, shopping and services

**Accommodate all forms of transportation:** A "Complete Street" for autos, bikes, pedestrians and wheelchairs, transit

**Balance** safety, traffic flow, and cost in design solutions

**Create an attractive streetscape** reflecting the unique qualities and character of the street along its different segments

Support **investment and revitalization** of shopping districts so that they become more walkable, attractive, and vibrant places

### Livable Moraga Road Study Campolindo High School Cross Country Team Survey

This survey's purpose is to understand how the Campolindo High School Cross Country Team uses Moraga Road. Your input will help the project team understand constraints along the corridor and identify opportunities for improvements.

Please complete this survey and return it at the **Cross Country Team Meeting** on the evening of **August 27th**.

The Livable Moraga Road project is a community-based planning effort for Moraga Road, looking at ways to improve the function, character and livability of the road between Campolindo Drive and St. Mary's Road. Key issues to be addressed in the project include travel, safety, and connectivity along the corridor for all users – auto, bicycles, pedestrians and transit – and how to strengthen the design and character of the roadway.
