

# Corliss Drive Safe Routes to School

## Project Description

**The Corliss Drive Safe Routes to School Project will improve pedestrian access along Corliss Drive.**

The primary goal of the project is to provide safe walking routes along the corridor between Wakefield Drive and Arroyo Drive to destinations including Los Perales Elementary School. The project will include a holistic look at alternatives to improve safety for all modes, including walking, biking, and driving along the Corliss Drive/Sullivan Drive corridor. Your input is needed for a successful project and will be solicited across three phases of engagement.
