

## 2022 PAVEMENT REHABILITATION PROJECT

June 23, 2022

Dear Resident-

As you are probably aware by now, **De Silva Gates** has placed **Chip Seal** on **Various Streets** around town.

**The second component of work is applying Microsurfacing as a coating and wearing surface over the newly applied Chip Seal. When applied together, it is known as Cape Seal, and it extends pavement life substantially.**

As with the Chip Seal work, the Microseal placement impacts street parking and it will be prohibited at posted times. Please look for "No parking" signs posted on barricades with specific days and hours of restricted parking. It is critical that no cars remain parked on the streets in these posted areas during the indicated times as they may be towed.

**Please visit the project website for more updates:**

## 2022 PAVEMENT REHABILITATION PROJECT

### AREA OF WORK

**CAUTION:** Microsurfacing takes around 90 minutes to cure. Microseal is a black emulsion that will stick to your tires and shoes if driven on wet. Please Do not drive through the wet surface until indicated by the construction crew and flaggers. Please do not operate sprinkler systems during the day of application.

After application, drive no faster than 15 MPH on the new surface. When parking or turning, please do not make sharp turns for the first 24hrs as it damages the material until it fully cures. **Expect Delays up to 15 min delays on the aforementioned dates from 8 am to 5pm.**

The Town apologizes for the inconvenience and appreciates your patience and cooperation with this project. The town will provide a detailed street by street schedule updates on the website. **The work is currently planned for Wednesday June 28<sup>th</sup> and Thursday 29<sup>th</sup>.**

*\*Please note the schedule can vary slightly from what is provided depending on the contractor's production rate, weather, and other factors. This is our best guess of the upcoming week's anticipated schedule.*
